**z. 27**

## Table of Contents

1. Mugur Acu, Dorin Blezu: Some preserving properties of the Alexander integral operator .....	5
2. Paula Curt, Gabriela Kohr: Properties of subordination chains and transition mappings in several complex variables .....	11
3. Jacek Dziok, H. Irmak: Some families of meromorphically multivalent functions and their applications .....	19
4. Lech Gruszecki: Ernst Schrder's Algebra of Logic .....	25
5. Edyta Leś-Bomba: Classes of functions related to the generalized hypergeometric function .....	29
6. Horia Ovesea-Tudor: On univalence condition .....	39
7. Krzysztof Piejko: Remarks on geometrical properties of Hadamard product of regular functions .....	43
8. Krzysztof Piejko, Janusz Sokół, Jan Stankiewicz: Hadamard product of functions subordinated to homography .....	49
9. Jan Stankiewicz, Anna Szpila: Some application of the Golusin Variation to the starlike functions with respect to $m$ -symmetric points .....	61
10. Janina Śladkowska: Analytic, symmetric functions that omit zero .....	69
