Table of contents

| | |
|---|-----|
| Jacek DZIOK, Ewald PAPROCKI: Classes of functions with two fixed points, involving the Carlson – Shaffer operator | 5 |
| Jacek DZIOK, Jan STANKIEWICZ: On a class of p -valent analytic functions with fixed argument of coefficients defined by fractional calculus | 19 |
| Krzysztof FRĄCZEK: Relationships between moduli of near convexity and near smoothness | 37 |
| Lech GRUSZECKI: A characterization of compact sets in $D_E[0, \infty)$ | 45 |
| Renata JURASIŃSKA: The classes of functions connected with certain functionals | 51 |
| Leopold KOCZAN: Radii of convexity in some directions for the class of typically real functions | 57 |
| Leopold KOCZAN, Paweł ZAPRAWA: Univalence problems in classes $\mathcal{T}(M)$ | 63 |
| Gabriela KOHR: On some differential inequalities for holomorphic mappings in several complex variables | 75 |
| Mirela KOHR: An integral method for interaction between a solid particle and a viscous drop in the half-space | 87 |
| Adam LECKO: On a majorization of derivatives for majorized functions in some subclasses of regular functions | 103 |
| Janina MACURA: A variational method for univalent functions connected with antigraphy, II | 113 |
| Ewald PAPROCKI: Algebraic and topologic structure of the space of Jordan curves | 125 |
| Anetta SZYNAL: Zero parameter's configurations | 133 |
| Anetta SZYNAL, Katarzyna WILCZEK: Extension operator of automorphism of the unit circle | 141 |
| Paweł ZAPRAWA: On typically real bounded functions with n -fold symmetry | 151 |
