TABLE OF CONTENTS

J. DRONKA, J. SOKÓŁ, Remarks on the location of critical points of a polynomial	5
J. DZIOK, Meromorphic multivalent functions with fixed argument coefficients	15
J. GODULA, Integral means of derivatives of functions on the unit ball	27
J. GODULA, $G^p(\alpha)$ -norm of the convolution of functions	31
A. LECKO, On reciprocal dependence of some classes of regular functions	35
Z. STANKIEWICZ, K. WILCZEK, Radii of ρ -convexity for some classes of functions defined by an integral operator	55
J. STANKIEWICZ, L. TROJNAR-SPELINA, Some operator properties of the special classes of functions with negative coefficients	63
W. SZUMNY, Extreme points of some unit ball in a space of real polynomials	73
W. B. VASANTHA KANDASAMY, Zero divisors in semi-loop near rings	79
A. WIŚNIEWSKA, Extremal properties for closed convex hulls of some subclasses of univalent functions	85
I. WŁOCH, Minimal Hamiltonian graphs having a strong $(k, k - 2)$ -kernel	93
A. WŁOCH, I. WŁOCH, On (k, l) -kernel minimal graphs	99
J. ZYGO, On a unified approach the law of the iterated logarithm for sequence of martingale differences with random indices	107
J. ZYGO, Strassen's invariance principle for random subsequences and their applications	117
