MATEMATYKA

z. 20

TABLE OF CONTENTS

J. Dronka, On Fredholm–Stieltjes and Hammerstein–Stieltjes integral operators over an infinite interval.....	5
J. Dziok, Classes of analytic functions involving some integral operator.....	21
J. Górnicki, Fixed points of lipschitzian semigroups in metric spaces with uniformly normal structure.....	41
S. Kanas, A. Lecko, Univalence criteria connected with arithmetic and geometric means, II.....	49
G. Kohr, On certain conditions of starlikeness of order α in \mathbb{C}^n	61
A. Lecko, M. Lecko, On a radius problem in some subclasses of univalent functions, II.....	73
E. Paprocki, J. Sokół, The extremal problems in some subclass of strongly starlike functions.....	89
E. Paprocki, J. Stankiewicz, A. Szynal, Convolution and some special angularly domains.....	95
E. Paprocki, J. Zajac, A linearization formula for the group of quasihomographies.....	109
D. Partyka, On approximation of complex-valued harmonic functions in Jordan domains.....	121
J. Patel, S. Rout, J. Stankiewicz, Certain subclasses of analytic functions with negative coefficients.....	131
L. Reséndis, J. Zajac, Maximal dilatation of the Beurling–Ahlfors extension operator.....	141
J. Sokół, W. Szumny, On a certain linear problem in the space of polynomials of degree at most 4.....	155
M. Startek, A parametric version of the triangle inequality for the Sibley and Prokhorov type distances.....	165
A. Szynal, J. Zajac, Extremal normalization.....	171
K. Wilczek, Schwarz lemma for quasihomographies of a Jordan curve.....	179
A. Wiśniowska, Majorization of derivatives in certain subclasses of starlike functions.....	193
