MATEMATYKA

z. 26

Table of Contents

1. **Zbigniew Jakubowski:** Kilka refleksji dotyczących funkcji jednolistnych ograniczonych 5
2. **Jerzy Tocki:** Systemowa konstrukcja celów kształcenia matematycznego 31
3. **Dorin Blezu, Dorina Răducanu:** The univalence of integral operator 45
4. **Wasył Czaban, Ewa Kycia:** Solutions nonlinear differential equations with partial differentials, which describe electromagnetic end thermal process in ferromagnetic environment 51
5. **A.A. El-Bary:** Fredholm - Volterra integral equation in three dimensional Problem with Macdonald kernel 59
6. **Marek Galewski:** A remark on problems with nonnegative variable in mathematical programming 67
7. **Renata Jurasińska:** Relations between some subclasses of Carathéodory class 77
8. **Leopold Koczan:** Univalence problems for classes of functions preserving sectors 89
9. **Joanna Kowalczyk:** Second order differential subordinations and certain subordination relations 97
10. **Anna Łazińska:** On complex mappings harmonic in the unit disc with some coefficient conditions 107
11. **Krzysztof Piejko:** Remarks on some convolutions of functions 117
12. **Krzysztof Piejko, Janusz Sokół:** Hadamard product of Schwarz functions of analytic functions 127
